**E**MS Safety's Bloodborne Pathogens training is a simple and cost-effective way to comply with the OSHA standard 29 CFR 1910.1030.

The program contains the latest requirements from OSHA and the CDC. Utilize our training to comply with the standard and reduce the occurrence and severity of occupational exposure to bloodborne pathogens!

Detailed information about each topic, along with a step-by-step lecture guide and comprehensive DVD, will enable new instructors to make professional presentations.

The self-study guide helps to develop expertise in the area of bloodborne pathogens. Safety officers and Instructors alike can improve their current course and save money with our program.
